EXECUTIVE SUMMARY

1. **SolarAir™ Cylinder (SAC) – Affordable, Scalable, Profitable; MW-to-GW Cumulative Electricity with CO2 DAC**

Freely Energized by Clean, Productive "Concentrated Solar Power" (CSP): SAC airflow generates low-cost multi-MW electricity and actively accomplishes CO2 direct air capture (DAC). SACs are designed to operate singularly and in multiple unit pods. SAC readily enables unique 21st Century electric grid layouts. Collectively, SACs will attain GWh volumes. In accordance with SAC onsite electricity usage, SAC energy surplus sells into grids. SAC's CO2 DAC is performed in parallel.

2. **SolarAir™ Tower-Chimney (SATC) – To *STOP* Global Climate Warming [large scale SACs supercharge SATCs insides]**

SATC will Profitably *STOP* Climate Warming – Few Years Remain: To Separate One Trillion CO2 Tons from Atmosphere!

100% Clean, Free Energy - "Concentrated Solar Power" (CSP): Solar Air Tech (SAT LLC), SolarAirPower™ (SAP), SolarAir™ Tower-Chimney (SATC) CSP energized mass-airflow convection will profitably improve, stabilize and continue to accountably regulate humanity's required life support climate structures. SAT LLC "***Sequestration-Cycle***" Direct Air Capture (DAC) of CO2 will amass enormous profits. "AirLic" Fuels™, e.g. SAF refined from DAC'd atmospheric CO2, will *Sequester-Cycle* trillions of gallons hydrocarbon-laden jet, gas and diesel fuels in vehicle, appliance and other mechanisms' fuel tanks. Government mandates and corporate agreements on Carbon Credits will manifest and establish billions of dollar exchange.

Via SolarAirPower™ Apparatus, SAT LLC will Affordably and Profitably ***TRUNCATE*** **Atmospheric CO2 Global Warming**: Generating MW-to-GW cumulative electricity and atmospheric dehumidification; SATCs' 100% clean CSP energized, high volume internal and external mass-airflow convections pass through broad ranges of CO2 DAC filters. Onsite and offsite manufacturing procedures intermix ambient air separated CO2 into short-term/long-term CO2 – CON-TROLL™ Sequestration-Cycle commodity/product molecular structures. CO2 – CON-TROLL™ goods' profit-filled sales will explosively increase. Global population seeking relief from increasing ecosystemic storm-conditions, that occur due to global climate warming, will praise while society applauds the purchase/use of items that accountably help to ***STOP Climate Warming***. Employment opportunities and monetary flows will surge in this new, robust CO2 – CON-TROLL™ carbon negative and carbon neutral wholesale and retail goods industry. CO2 – CON-TROLL™ climate warming abatement commodities/products are needed, sought and will be bought. Cyclical CO2 – CON-TROLL™ sales will expand international businesses, increase global market sales and globally bolster finance parameters. Profitably, resoundingly – SATC will help ***STOP*** **Global Warming**. Profit filled, ongoing SATC atmospheric temperature maintenance/control will ensue for decades.

Solar Air Tech LLC – Uniquely Proprietary, High Income, Foundational-Design SolarAirPower™ Apparatus; Accomplish:

1. 100% Cleanly Produced Electricity – To Notably Help Fulfill National and International Increasing Energy Demands.
2. Massive Removals of Atmospheric CO2 and Humidity – Superior Global Assistance to Climate Warming Abatement.

Solar Air Tech LLC – Scalable, Efficient, Low Cost, Fast Assemble and Profitable CSP Mass-Airflow-Convection Apparatus:

A. **SolarAir™ Cylinder:** Daily – Clean generation; multi MWh electricity. Annually – Thousands of tons CO2 DAC.

B. **SolarAir™ Tower-Chimney:** Daily – Clean generation; many MWh electricity. Annually – Hundreds Thousand tons CO2 DAC, mass dehumidification, onsite/offsite Sequestration-Cycle CO2 – CON-TROL™ commodities/products.
